

Here are several topics discussed at the February 19, 2009 BEPCO Board of Directors meeting:

- The 02/11/09 meeting with the DNR and Wisconsin Valley Improvement Company, the power point presentation will be shown at the 03/08/09 meeting.
- Reservoir Capacity, do we need to hire an independent party (or can our members do it?) to analyze the capacity of the flowage? Has the capacity changed since the flowage was created? Need Data.
- The DNR and/or WVIC currently do water testing on the flowage. We need to test further up stream and for more than just oxygen!
- Randy Brown said he has started the process of monitoring the water level and navigation on the flowage and its' tributaries.
- The Board of Directors will set up a meeting with the Board from the Petenwell Flowage.
- There was also discussion on obtaining the Army Core of Engineers Photos of the Big Eau Pleine Flowage for past years.
- Fundraising, either obtaining a license to do a raffle, teaming up with another club, perhaps a local snowmobile club and using their license or just doing 50/50 raffles and silent auction.
- Also the dates coming up and what needs to be done for 2009 Recreation and 2011 Water Level.

Next BEPCO Board of Directors meeting is scheduled for Thursday, March 19, 2009 at Safari Bar in downtown Halder.
